## **Government's Big Move:** Enhancing Wraparound Care for Primary School Children with CMXSC

In an era marked by transformative initiatives in education, the government's commitment to enhancing wraparound care for primary school children is a pivotal move. CMXSC stands at the forefront of this endeavour, ready to support schools and families as we collectively navigate this exciting trajectory toward accessible, affordable, and flexible childcare solutions.

### **Understanding the Shift: What is Wraparound Care?**

Wraparound care, in the context of this significant governmental move, refers to before and after-school childcare for primary school-aged children during term time. The goal is to extend the availability of programs like breakfast clubs and regular afterschool provisions, running until 6 pm or later. CMXSC aligns seamlessly with this vision, providing Ofsted Registered Activate & Elevate Wraparound Care programs designed to meet the unique needs of each school community.

### **Expanding Access: A Promise for the Future**

From September 2024, parents can anticipate a notable increase in the number of wraparound childcare places available across the country. The government's ambition is clear: by September 2026, all parents who need it should have access to wraparound care, either from their school or another provider in their local area. CMXSC stands ready to play a crucial role in fulfilling this promise, offering bespoke wraparound care programs that enhance the overall educational experience.

## Who Will Benefit?

The government's vision extends to all parents in England with primary school-aged children, aiming to make wraparound care accessible in their local areas. Fees will be set by providers, and parents eligible for Tax-Free Childcare or Universal Credit Childcare can utilize the support to make wraparound care more affordable.

## Supporting Local Authorities: A Collaborative Approach

To facilitate the expansion of wraparound care, local authorities will receive financial support—£289 million—to map out and accommodate the needs of parents in their areas. This funding will also enable them to explore various strategies, including partnerships with private providers like CMXSC, to increase wraparound options.

CMXSC is poised to be an active participant in this collaborative effort, utilizing our expertise to provide high-quality wraparound care that complements and enhances the government's vision for accessible childcare. Stay tuned as we continue to explore the intricacies of this significant move and how CMXSC is contributing to the evolving landscape of wraparound care.
